

Intern Assessment: Git & Azure DevOps Research Presentation

Objective

This assessment is designed to:

- Improve your **research skills**
- Strengthen your **technical understanding**
- Develop your **presentation and communication skills**
- Build confidence explaining technical concepts clearly

This is **not** a coding assessment.

It is an understanding and communication assessment.

Assignment Topic

◆ Research Topic:

Git Fundamentals & Pushing Code to Azure Repositories

You are required to research and present on:

1. What is Git?
 2. What is version control?
 3. What is Azure DevOps?
 4. What is an Azure Repository?
 5. The complete process of pushing code to:
 - A Git repository
 - An Azure DevOps Repo
-

Required Research Areas

Each intern must cover the following:

1 Understanding Git

- What problem does Git solve?
- Distributed vs Centralized version control
- Key Git concepts:

- Repository
 - Commit
 - Branch
 - Merge
 - Pull
 - Push
 - Clone
-

2 Git Workflow (Local to Remote)

Explain step-by-step:

- `git init`
- `git add`
- `git commit`
- `git branch`
- `git checkout`
- `git merge`
- `git remote add`
- `git push`
- `git pull`

You must explain:

- What each command does
- Why it is used
- When it is used

Not just definitions — explain it like you are teaching a beginner.

3 Azure DevOps & Repositories

Research:

- What is Azure DevOps?

- What services does it provide?
 - What is Azure Repos?
 - How Azure Repos integrates with Git
 - Differences between:
 - GitHub
 - Azure Repos
 - Local Git repositories
-

Practical Flow: Pushing Code to Azure Repo

You must explain the full process:

1. Create a project in Azure DevOps
2. Create a repository
3. Clone the repo
4. Make changes locally
5. Commit changes
6. Push changes to Azure

You may include:

- Diagrams
- Command flow
- Screenshots
- Flowcharts
